

MINI TATTOOS PRECARE

To assure your skin is in optimum health prior to treatment you can start moisturizing the area to assure when the treatment is done it goes more smoothly. If needed, please exfoliate the area to make sure there are no dry marks. I recommend a sugar and honey mix.

Appropriately preparing for the procedure can lessen skin sensitivity and reduce any irritations that may occur.

FOR 5 WEEKS PRIOR TO YOUR TREATMENT DO NOT:

Use or take any Vitamin A/Retinoid products on or near area treated.
Have Botox or Fillers around the area wanting treatment.

FOR 2 WEEKS BEFORE YOUR TREATMENT DO NOT:

Tan or spend prolonged time out in the sun.

FOR 1 WEEK BEFORE YOUR APPOINTMENT DO NOT:

Take fish oil, iron supplements, or Vitamin E. Please refrain from using any Vitamin E products on the area to be treated. The fish oil and iron supplements may cause bruising.

FOR 28-48HRS PRIOR TO YOUR TREATMENT DO NOT:

Work out or undertake excessive forms of physical exercise.
Drink alcohol, coffee or other caffeine products.
Take any pain reliver without telling your technician.

ON THE DAY OF THE APPOINTMENT DO NOT:

Apply makeup to area of the treatment. This includes tinted products.

OTHER PRECAUTIONS:

Please drink lots of water and eat plenty of food before your appointment. Wear clothing that's easy for the technician to reach the location of the tattoo.

If you are worried about pain please tell the technician. Do not put your own numbing cream on the area before coming in, if you are to need numbing cream the technician can apply it during appointment. Certain numbing creams may interfere with the color deposit of the tattoo and therefore the outcome. Extra time might have to be booked to accompany the numbing creams.

If you have any conditions or diseases, consult your doctor and check if you are a candidate for the mini tattoos.

It is important to follow these instructions to assure there will be no infections
and your color will stay.

If you have any concerns or questions, please do not hesitate to contact the
technician.
